

# INFO 1213 Course Project

This is an individual course project, and you should be the **only** author of all codes involved

## Objectives

In the course project, you will implement the website (designed in the Assignment 3) for the imaginary business you have in the GoormIDE.

Make a video/screen recording to present your course project website.

## Submission Guidelines

**Step 1:** Please submit the course project report in the PDF format. The details can be found in the Mandatory Requirements.

**Step 2:** Please submit the following to the **Course Project Peer Assessment Submission** section in Moodle.

- GoormIDE Project Share Link
- Assignment 3 Github Repo Link
- Course Project PDF file

The Project Share Link can be found by following the instructions in:

<https://help.goorm.io/en/goormide/03.collaboration-capabilities/share-the-project#2-share-with-a-dashboard>

You can see the share link on the dashboard. The share link follows the format of <https://goor.me/XXXXX>

**Step 3:** Please export your project folder as a ZIP file following the instructions at

<https://help.goorm.io/en/goormide/04.project-management/export>

All you need to do is to right-click the root directory of the project folder, and select Export File. Then submit the ZIP file in the **Course Project File Submission** section in Moodle.

## What to do

### Mandatory Requirements:

1. The website should be consistent with Assignment 3.
2. The course project report should contain the following 4 sections
  - **Description of the Business**
    - Describe what the business is, the product/service the business is providing, and the potential customers. For this part, you can improve upon what you wrote in

Assignment 3 with more details.

- **Compare Figma Wireframes with the Screenshots of your website**
  - In this section, you include both the wireframes and screenshots of the corresponding webpages. Describe the reason of any difference, if you have.
- **Instructions to run your project in GoormIDE**
  - In this step, you provide step-by-step instructions preferably with screenshots to show how to run your project in GoormIDE so that your GoormIDE project can be successfully run by others.
- **Feature/Content Explanations**
  - Explanation of the website features/content that you have in the course project website from both a business (this is **not** the focus) and technical (this is the focus) perspective. The focus here is different from Assignment 3. You should explain **why** and **how** you added certain features/content in this part via text and code snippets.

## Instructor Comments

- Interviews may be scheduled with some students to verify whether the work is actually his/her own. If based on the interview, the instructor believes that your work was not completed by yourself, a 0 will be assigned to your work and a suspected plagiarism report will be filed. If no confirmation of the interview is received from you within the specified date, a 0 mark will also be assigned.

## Grading Rubrics

	Good (25 marks)	Acceptable (20 marks)	Amateur (15 marks)	Unsatisfactory (10 marks)
Front-End	The Website demonstrates a solid understanding of frond-end technologies including HTML, CSS, JavaScript, JQuery and Bootstrap	The Website demonstrates a good understanding of frond-end technologies including HTML, CSS, JavaScript, JQuery and Bootstrap	The Website demonstrates an acceptable understanding of frond-end technologies including HTML, CSS, JavaScript, JQuery and Bootstrap	The Website demonstrates a week understanding of frond-end technologies including HTML, CSS, Javascript, JQuery and Bootstrap
Back-End	The Website demonstrates a solid understanding of back-end technologies including Express,	The Website demonstrates a good understanding of back-end technologies	The Website demonstrates an acceptable understanding of back-end technologies	The Website demonstrates a week understanding of back-end technologies including Express,

	NodeJS, MongoDB	including Express, NodeJS, MongoDB	including Express, NodeJS, MongoDB	NodeJS, MongoDB
Project Report	Great, clear and detailed explanation.	Detailed Explanation.	The explanation is not very in details.	Need much extra work
Overall Evaluation	A Solid Course Project	A Good Course Project	An Acceptable Course Project	Doesn't meet the standards

## **Final Comments for Graders:**

### **Please simply mark the assignment 0 if**

1. The file cannot be opened.

### **Please simply mark sections 0 if the corresponding section is missing.**

### **Please email me if you find**

1. High similarities among student submissions.
2. High similarities between the student submission and another webpage.
